

Get the Accurate Resale Value of your Car!!!

With difficult economic conditions, it is likely that sales of reconditioned second-hand cars will increase. In most of the countries, it is common to lease a car rather than buying it outright. A lease is a binding contract between a buyer and a seller in which the buyer must pay fixed installments for a pre-defined number of months/years to the seller/financier. After the lease period is over, the buyer has the possibility to buy the car at its residual value, i.e. its expected Resale value. Thus, this application is of commercial interest to seller/financier to be able to predict the residual value of cars with accuracy.
